

Ontario's Future: Migration Builds, Aging Challenges

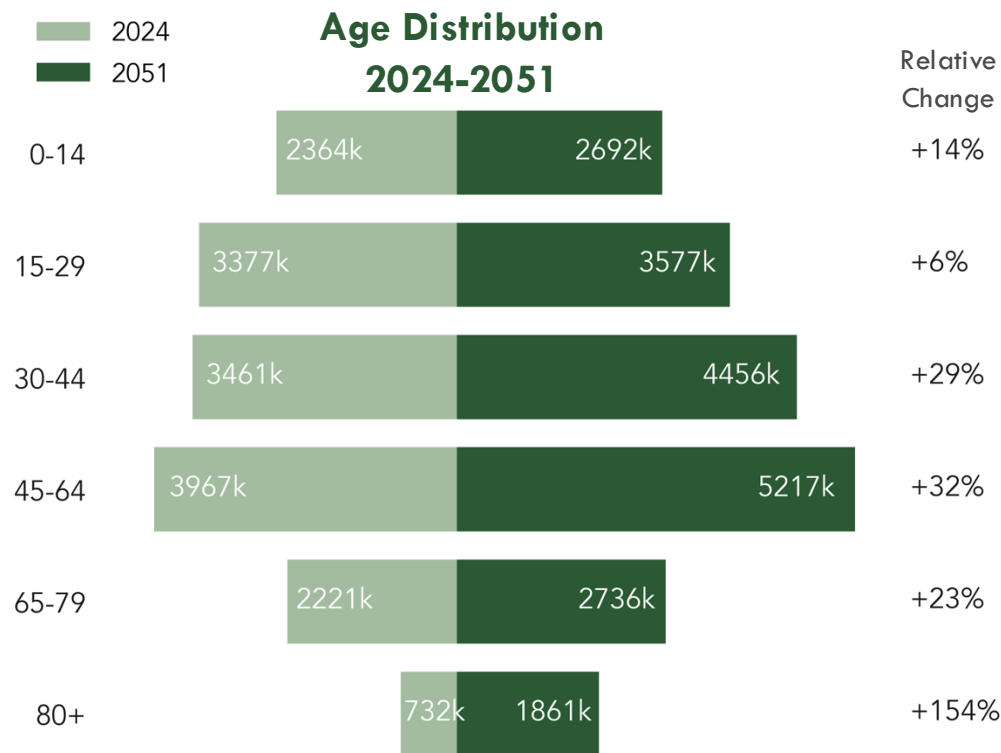

ONTARIO'S NEXT 27 YEARS

Ontario's population is projected to rise from **16M** in 2024 to over **20M** by 2051. An increase of **4M** people, or 27.4%

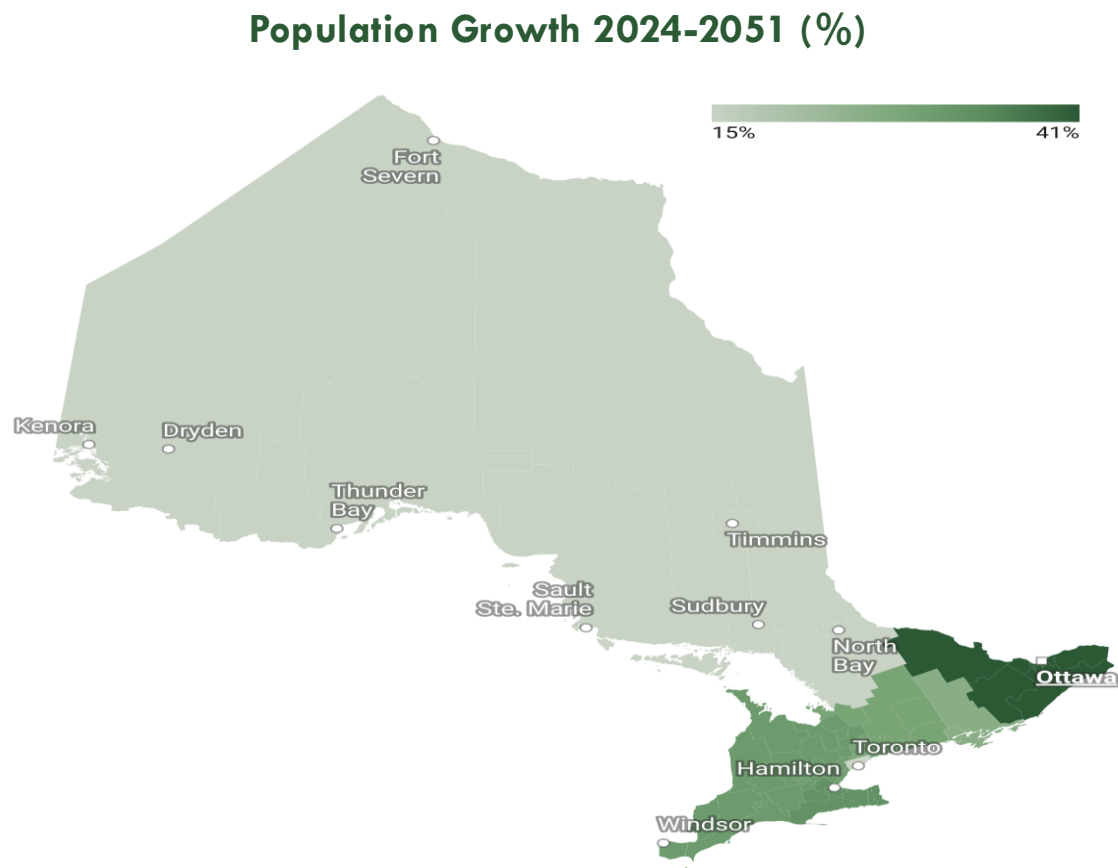

Ontario's age structure shifts sharply by 2051:

younger cohorts grow only modestly, while older groups expand rapidly

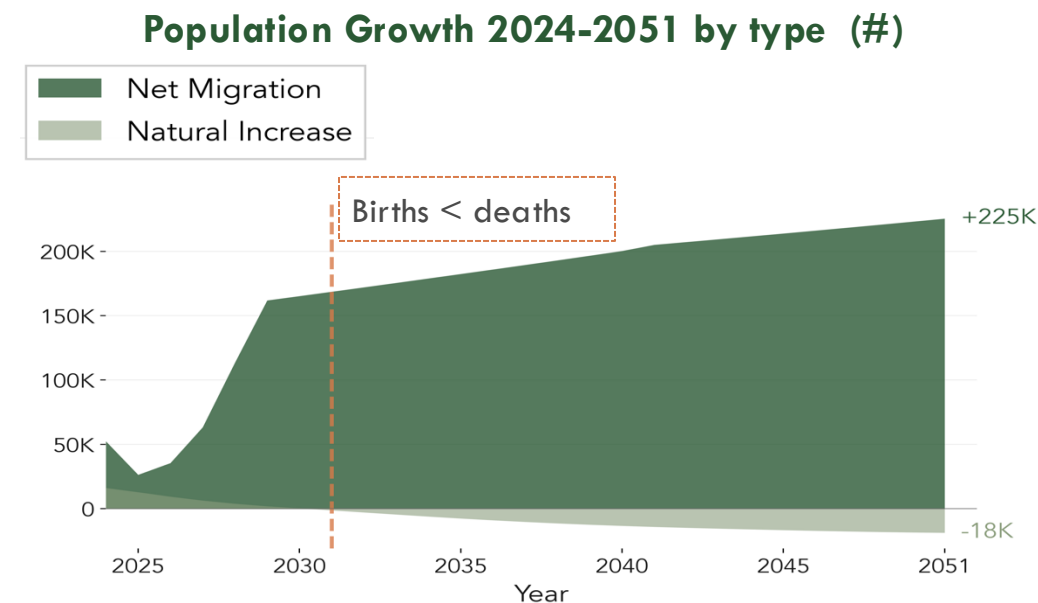

Growth is uneven across regions:

East +41%, Hamilton-Niagara +33%
Central/South 26–31% and Toronto & North just 15%

Ontario's population growth increasingly depends on migration:

After 2031 births fall short of deaths and migration alone sustains growth

- Regional differences shape distinct challenges for health care, housing, and social services.
- Future prosperity depends on how well Ontario supports newcomers across every region.
